

IN SUMMARY

- 📖 Children will be taught to always estimate first.
- 📖 They are taught to always check the answer, preferably using a different method e.g. the inverse operation (check a subtraction by doing an addition).
- 📖 They will always decide first whether a mental method is appropriate.
- 📖 When helping, pay attention to language - refer to the actual value of digits.
- 📖 Children who make persistent mistakes will return to the method that they can use accurately until ready to move on.
- 📖 Children need to know number and multiplication facts by heart.
