

## PARLEY FIRST SCHOOL

### **SEX EDUCATION, HEALTH & RELATIONSHIPS POLICY**

Parley First School's approach to health and sex education is that, in view of the age of our children we provide a grounding in basic health education. This is achieved through our rainbow program, science curriculum, circle time, assemblies, religious education and incidental activities. Topics covered will prepare children for the excellent sex education programme carried out in the Middle Schools.

All teaching staff are sensitive to children's natural curiosity and will respond to questions honestly and in a manner appropriate to the child's age and maturity.

If any child expresses a particular interest in sexual matters this will be discussed with parents.
